REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art does not show or fairly suggest the claimed invention of an optical scanning device having the claimed structure and claimed limitations, wherein a rejection under 35 USC 102 or 103 would be improper. Please particularly note the combination of claimed elements and claimed limitations, including as recited in claim 1, an optical scanning device for scanning an information layer and of a radiation beam, the device comprising a radiation source for emitting said radiation beam, an objective for converting said radiation beam to a scanning spot at the position of said information layer, and mounting means to adjust the distance between the radiation source and the objective, characterized in that an optical component is provided by means of which the rim intensity of the radiation beam at the entrance pupil of the objective is substantially independent of the distance between the radiation source and the objective for constant marginal beam angle of said radiation beam at the entrance pupil of the objective.

Therefore, the claimed invention is considered to be in condition for allowance as being novel and nonobvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

2. The drawings were received on 10-10-07. These drawings are approved.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following are a U.S. Patent and a U.S. Patent Pub. directed to optical scanning devices:

Tukker et al	U.S. Patent 7,170,832 B2
Hendriks et al	U.S. Patent Pub. 2006/0158971 A1
